

Picking Performer Ewes™

ABOUT PICKING PERFORMER EWES™

The AWI developed and funded Picking Performer Ewes (PPE) workshop is designed for wool producers aiming to lift the lifetime performance of their Merino ewes. PPE identifies key practical actions for commercial enterprises to implement on-farm to achieve this performance aim.

PPE assists the commercial self-replacing Merino production sector in recognising and placing appropriate importance on the total lifetime productivity potential and value of their Merino ewes (fleece, meat and surplus stock) and aims to achieve a minimum weaning rate of 95% from Merino joinings.

PPE complements the AWI-funded Lifetime Ewe Management (LTEM) course, and is ideal as an LTEM refresher but also for those who haven't completed LTEM yet. PPE is one of AWI's one-day workshops (with Winning With Weaners and RAMping Up Repro) which are all 100% standalone yet 100% complementary.

THE 5 KEY THEMES OF PPE

1. Understand ewe lifetime performance
 - passengers vs. performers
2. Lift ewe performance
3. 3 key performance practices:
 - scan
 - condition score
 - wet/dry at marking
4. Turning potential to profit – join, lamb and wean well; and measure
5. Strategies for success – management calendar and strategies to lift net reproduction rate to minimise wastage and inefficiency

WHAT YOU NEED TO KNOW ABOUT RPP

- single day workshop (9:00am - 2:30pm)
- conducted through AWI's State Grower Networks
- 15 - 25 participants per workshop
- fully catered
- \$75 per person
- delivered by accredited deliverers

ATTENDEES RECEIVE

- full set of workshop notes
- management calendar
- checklist for use in their own operation
- information on pathways for future learning

WHEN AND WHERE

Workshops are run on a demand basis through AWI's State Grower Networks across Australia. To see upcoming workshops in your region, go to:
